

HYACINTH CYRIL T. ENOG

PROFESSIONAL SUMMARY

Motivated Information Technology Specialist with experience in systems analysis, database management, and software development. Skilled in building and maintaining applications using PHP Laravel, VB.NET, JavaScript, Vue.js, and MySQL, with working knowledge of Firebase (NoSQL). Experienced in designing user-friendly interfaces, ensuring data accuracy, and collaborating effectively in team-based environments. Able to translate user requirements into functional system solutions and troubleshoot software systems efficiently.

KEY SKILLS

- Systems Analysis & Database Management
 - Quasar, Vue.js, Bootstrap, VB.Net, HTML5, CSS3, JavaScript,
 - PHP Laravel, MySQL, SQLyog, Firebase real-time database (NoSQL)
 - Figma, UI/UX Design, Responsive Web Design
 - Communication, Problem Solving, and Team Collaboration
-

WORK EXPERIENCE

System/Web Developer

Jan 2026 - Present

AURA FORTUNE G5 TRADERS CORPORATION

- Developed a web-based payroll system using Laravel and Vite, focusing on efficient payroll processing, accurate employee data management, and a user-friendly interface. Designed and implemented system features to automate salary calculations, manage employee records, generate payroll reports, and improve overall workflow efficiency while ensuring system reliability, performance, and ease of use.

Web Developer / Web Designer / GHL Expert

Jul 2025 - Present

Pentwater Connect, Website Developer Team

- Designed and maintained web-based information systems focused on usability, performance, and data accuracy by analyzing client requirements, translating them into functional features and automated workflows, developing and maintaining system components using WordPress, GoHighLevel, Wix, Shopify, HTML, CSS, and JavaScript, implementing process automations to reduce manual tasks, conducting testing, troubleshooting, and updates to ensure reliability and scalability, and collaborating with team members and end-users to enhance functionality and user experience.

Programmer – On-the-Job Training (OJT)

Mar 2025 - Aug 2025

City Of Tagum, Programming Department

- Designed, developed, and supported four custom information systems that improved operational efficiency across multiple city departments by conducting system analysis and evaluations, assessing functionality, usability, and performance, enhancing the city's job posting kiosk system for improved data accuracy and accessibility, collaborating with IT personnel, administrative staff, and end-users to gather requirements and implement improvements, and supporting testing, troubleshooting, and post-deployment activities to ensure system reliability.

Frontend Developer (Freelance)

Nov 2022 - Mar 2025

- Designed UX/UI layouts using Figma based on real user feedback and requirements.
- Collaborated with clients and designers to ensure a consistent, user-friendly interface.
- Coordinated with senior developers to ensure consistency and usability.

PROJECTS

OJT Immersion Management System- Quasar, Vue.js, JavaScript

- Developed a QR-based attendance system for interns and immersion students to monitor daily time-in and time-out.
- Built three role-based modules: Student (registration & QR generation), Supervisor (QR scanning & performance scoring), and Admin (centralized monitoring & reporting).
- Enabled accurate tracking of attendance, evaluations, and student records.
- Reduced manual attendance processes and improved monitoring efficiency.

Remittance Management System- Quasar, Vue.js, JavaScript

- Developed a system that displays monthly total remittances, including detailed deduction types and summaries.
- Managed employee records with complete deduction and remittance tracking for accurate financial reporting.

CAGRO Seedling Portal — HTML, CSS, JavaScript, MySQL

- Designed UX/UI layouts using Figma based on real user feedback and requirements.
- Collaborated with clients and designers to ensure a consistent, user-friendly interface.

Point of Sale (POS) System — VB.NET, WinForms, SQL

- Developed desktop POS features: product catalog, cart, discounts, receipt printing, and daily sales reports.

UM Research Portal — HTML, CSS, JavaScript, PHP, MySQL

- Built submission/review pages and authentication with PHP, handling file uploads and role-based access.

EDUCATION

Bachelor of Science in Information Technology

University of Mindanao

Aug 2021 - Aug 2025
